

## **Waste Management Upstream Environmental, Health & Safety and Quality Policy Statement**

---

### **Purpose**

The purpose of the Environmental, Health & Safety and Quality Policy is to publicly affirm Waste Management Upstream's commitment to environmental protection, prevention of injury and promotion of safety and good health, and quality management.

### **Scope**

All Waste Management Upstream owned, managed, or controlled operations, including Green Squad, share responsibility to advance the principles of this Environment, Health & Safety and Quality Policy.

### **Policy**

Waste Management Upstream is committed to protecting human health & safety, the environment and prevention of pollution. Waste Management Upstream is committed to providing superior services and solutions in conformance with contractual and regulatory requirements that meet our Customer's needs. These core values are reflected in the services we provide to customers, the management of our operations, the conditions under which employees work, and our interactions with the communities where we do business.

WM Upstream will:

- conduct our operations in a manner that strives to protect the environment, and health & safety of our employees, neighbors, and customers, and will strive to exceed their quality expectations.
- comply with relevant and applicable legal and other requirements to which the corporation subscribes, and will proactively implement programs and procedures to promote compliance.
- foster a culture of actively caring for all human life, while striving to eliminate unsafe behaviors and conditions.
- encourage conservation of nature and the earth's energy resources.
- urge all Upstream employees and those working on our behalf to help the Company identify possible environmental, health & safety, and quality issues in order to continually improve the effectiveness of the management systems.
- strive to meet the Customer's needs in all these key areas while maintaining our focus on employee safety, skills, morale, and ethics.

In accordance with our Management System requirements, the environment, health & safety, and quality performance, and objectives and targets will be reviewed periodically to assess progress toward continual improvement. The policy statement will be made available to the public and communicated to all persons working for or on behalf of Waste Management Upstream.

  
Harry Lamberton  
Vice President – Waste Management Upstream
